THE MOST EFFICIENT WAY FOR SMART WINDOW CLEANING

Efficiency and safety are of utmost importance for the professional cleaning of windows and other smooth surfaces **indoors**. Window cleaning with conventional tools is very time consuming. High windows are especially difficult to clean, usually only with the risky use of ladders.*

With the revolutionary **Stingray**, **UNGER** offers the most efficient indoor cleaning system of all times, now with a 150 ml refill tank. This means:

- ▶ 25 % faster glass cleaning**
- ▶ 39 % less chemicals**
- ▶ Ready to use and easy to operate
- ▶ Ergonomic and safe: no inhalation of spray mist, won't cause fatigue
- ▶ Can be flexibly used with all alcohol-based glass and surface cleaners
- ▶ 5m Working Height

* Source: Market research conducted with professional glass cleaners in Germany and the UK, 2015, SR Strategy Routes.

**Compared with conventional cleaning methods with spray and cloths [Source: Zeit- und Verbrauchsstudie Glasinnenreinigung, 16.07.15, Sabine R. Mück, Hygiene Consult Mück]

Given the large square footage of glass surfaces that we need to clean at Frankfurt Airport, the Stingray is a major economic advantage.

Klaus Ewig, GCS Gesellschaft für Cleaning Service mbH & Co. Airport Frankfurt Main KG
